1 1. (Twice Amended) A cored wire for introducing additives into a
2 molten metal bath comprising a wire core (6) having a metallic sheath (5) thereon
3 containing an additive, and a wrapping (7) around said sheath, said wrapping (6)
B1 4 being combustible without leaving harmful residues, said wrapping being made of a
5 material that will momentarily retard propagation of heat to the wire core (6) when
6 introduced into the molten metal bath.

1 3. (Twice Amended) The cored wire according to claim 2, wherein
B2 2 paper (7A) is a pyrotechnic paper.
